Sector of activity and company description

Example: My company, located in the heart of the Belgian Ardennes, is specialised in cattle breeding. About 200 Belgian Blue White heifers are currently being fattened there. Some of the meat produced is sold directly to the consumer through our butcher's shop on the farm, while the other part is marketed by butchers in the supermarkets of the area.

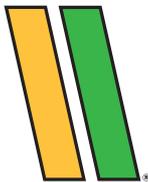

Which event or triggering factor led you to this purchase?

Example: We had the opportunity to take over a neighbouring farm because its former owner had reached pensionable age and had no successor in sight. This take-over was welcome, as it will enable us to strengthen our future. But who says more cows, says more hectares, which also means more work and more distances to cover... That is why we needed a larger slurry tanker. This is the main reason why we wanted to buy a new machine... and the choice went to JOSKIN. This new machine will allow us to be more effective and profitable.

Why did you choose the JOSKIN brand?

Example: The JOSKIN brand is renowned for its quality, efficiency and durability. We also gathered information from acquaintances who were satisfied with their machines. After several contacts with our dealer, he was able to recommend us the machine best suited to our needs.

What features do you like best about your new JOSKIN machine?

What are the main advantages of your machine?

Example: We have been using our new JOSKIN Volumetra tanker for 2 months. The Jumbo 8" filling arm provides an unequalled comfort. Combined with the 15,500 l/min pump, it allows us to comfortably fill the tanker in only 2 minutes. It's an incredible time-saver on a working day... not to mention the fact that our hands no longer smell manure, etc.

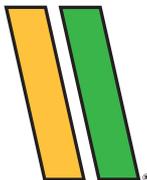

Pictures (landscape format, JPEG) to be sent to your dealers, e.g.:
the machine in action, you in front of your machine, etc. (see example)
